

# Making Embellishments from Paper Designs

1

2

1. Select your paper design from your *Content* panel and add it to a blank page

2. Click on the *Cut and Fill* ribbon and select Wand from the cutters.

3. Hover the wand (zoom to enlarge the paper to make this easier) over the areas you wish to include in your design and click. Continue clicking until all areas of the paper you wish to copy for your new embellishment are selected.

NOTE: you may need to adjust the intensity and colour sliders to have your selection the way you want.

4. Click copy selected areas.

5. Position the new embellishment on your page. Personalize by adding a shadow, filter or surface effect under the *format* ribbon or rubber stamping your selection under the *Insert* ribbon. Flip or rotate

TO SAVE for use again:

1. Right click on element in element panel.
2. Click - Save Selection as Content
3. Add it to your "favourites" folder My Stuff.
