

# Using Digital Edges

1. Select the paper or photos you wish to edge cut, by clicking on it in the element panel or on the page work space.

2. Click on the Cut & Fill ribbon

3. Click on the tiny arrow under the Straight cutter tab

4. In the cutting option menu, Click on Shaped Edges.

5. In the pop up box, click on the small arrow to the right of the Shape view box... and then browse your content (click on the tiny arrow on the right of the content name box) to locate the Basic Digital Edges package.

6. Choose your edge and position, adjusting sliders to widen the selection area, or moving the aspect ratio or spacing slider to get the pattern you need.

7. Click on Invert the shaded area if necessary, the shaded area is what will be cut away.

8. Click either Erase the Shaded area to remove the shaded pattern or Cut around the shaded area, which will allow you to move the chosen pattern to another part of the page ie for a border.
